

Mt. Washington Pediatric Hospital

FACTS

Since 1922, Mt. Washington Pediatric Hospital (MWPH) has played a key role in children’s health care throughout the Baltimore region, offering sophisticated medical care in a family-friendly atmosphere. Children are able to heal, grow, go home stronger and learn the skills that lead to happier, more independent lives. MWPH is jointly owned and operated by the University of Maryland Medical System and Johns Hopkins Medicine.

MT. WASHINGTON PEDIATRIC HOSPITAL OFFERS

Family-focused care. We focus on supporting our children and their families to ensure that the healing continues — even after the hospital stay.

Coordinated, state-of-the-art care. Young patients receive a wide range of services, including neonatal transitional care, psychology, and treatments for asthma, diabetes and sports injuries.

Quality care. By working closely with Maryland’s leading hospitals and pediatricians, we become our children’s bridge to better health.

World-class partners. Our unique partnership with our two prestigious affiliates, the University of Maryland Medical System and Johns Hopkins Medicine, offers us access to the best in medicine.

OUR REGIONAL PROFILE

MWPH’s **Center for Neonatal Transitional Care** is the only facility of its kind in the Mid-Atlantic region.

MWPH has the **largest and most comprehensive lead-poisoning treatment clinic** in the Baltimore metropolitan area.

MWPH has the **largest and most comprehensive program for weaning babies exposed to drugs in utero** or because of drugs medically prescribed for sedation or pain management.

MWPH operates the region’s only **pediatric sleep program** for complex sleep disorders.

MWPH maintains **Stage 6 status** by HIMSS Analytics for the adoption of electronic medical records.

- Weight Management and Healthy Living

*MWPH services offered at Prince George's Hospital Center.
 •MWPH services also offered at Mt. Washington Pediatric Community Rehabilitation Services in Harford County.

INPATIENT SERVICES AND DAY PROGRAMS

The Sheila S. and Lawrence C. Pakula Center for Infant Specialty Care (CISC) serves babies who no longer need to be in a NICU, yet need a medically stable environment to ensure their growth, feeding and readiness to go home. MWPH staff treat babies who are born prematurely with feeding issues or pulmonary disease, or who are weaning off of medication. The goal is to prepare babies and their families to go home together.

The Pediatric Complex Care Program helps children with chronic or complex medical illnesses transition to home. As the staff assist children in becoming medically prepared for a life at home, they give families the knowledge and skills to meet all complex care needs.

The Physical Medicine and Rehabilitation Program helps children recover from traumatic injuries, illness or surgery such as limb reconstruction following multiple fractures, post-surgical orthopedic rehabilitation, management of burns or wounds, neurological disorders, spinal cord injury, amputation or brain injury.

Hospital Day Programs provide daytime treatment for children who require intensive interventions for rehabilitation or feeding needs, and incorporate therapies and medical treatment with meals, educational services, and other activities.

QUALITY AND ACCREDITATION

- The Joint Commission
- Commission on Accreditation of Rehabilitation Facilities (CARF)
- College of American Pathologists (CAP)
- American Academy of Sleep Medicine (Johns Hopkins Pediatric Sleep Center at MWPH)
- American Psychological Association (Psychology Internship) and Pediatric Care
