

# UNIVERSITY of MARYLAND MEDICAL CENTER

## MIDTOWN CAMPUS

### FACTS

Since its founding more than 130 years ago as a community teaching hospital, the University of Maryland Medical Center Midtown Campus (UMMC Midtown Campus) —located in Baltimore’s cultural center near the historic Mount Vernon neighborhood—has provided access to a full range of medical and surgical care. UMMC Midtown Campus is one of two locations of the University of Maryland Medical Center, the flagship hospital of the University of Maryland Medical System.

#### MAJOR CENTERS

The world-class **University of Maryland Center for Diabetes and Endocrinology** is staffed by physicians recognized by the National Committee for Quality Assurance. The education program meets the national standards for diabetes self-management education.

The **University of Maryland ALS Center** is the only Treatment Center of Excellence in Maryland certified by the ALS Association.

The new **University of Maryland Center for Pulmonary Health** offers comprehensive care for a range of disorders, including asthma, interstitial lung diseases, COPD, collapsed lung, bronchitis and lung cancer.

The **Vascular Center’s** non-invasive laboratory is fully accredited by the Intersocietal Accreditation Commission.

The **Wound Healing Center’s** partnership with the University of Maryland School of Medicine and UMMC University Campus gives patients access to the latest research and technology in wound care.

The state-of-the-art **University of Maryland Sleep Disorders Center** conducts overnight and daytime sleep studies to help diagnose a wide range of sleep disorders.

The **University of Maryland Center for Infectious Diseases** provides expert care to prevent and combat infectious diseases caused by bacteria, fungi, parasites and viruses.

Through its partnership with the **Institute for Human Virology**, the center also focuses on education, prevention and clinical care for those with HIV/AIDS and hepatitis. The JACQUES Initiative is a community outreach program focused on peer counseling to ensure long-term treatment success.

#### QUICK NUMBERS

<b>170</b>	Total Licensed Beds
<b>1,380</b>	Employees
<b>530</b>	Medical Staff
<b>4,526</b>	Admissions
<b>113,031</b>	Outpatient Visits
<b>24,438</b>	Emergency Visits
<b>5,023</b>	Outpatient Surgical Cases

## RECOGNITION AND AWARDS

UMMC Midtown Campus was recognized at the **Maryland Patient Safety National Conference** for its **Post Acute Specialty Program (PASP)** for performance improvement success in reduction of ventilator-associated pneumonia (VAPs).

In 2016, the UMMC Midtown Campus stroke program received the Gold-level **Performance Achievement Award from the American Heart Association/American Stroke Association's** Get with the Guidelines program for the fourth year in a row.

For 2017-2018, UMMC Midtown Campus was recognized by **U.S. News & World Report** for its high-performing care in adult **Diabetes & Endocrinology**.

## COMMUNITY HEALTH IMPROVEMENT

UMMC Midtown Campus promotes wellness inside as well as outside its walls by offering seminars, lectures, health fairs, free health screenings and support groups.

The **Community Health Education Center (CHEC)** promotes and maintains community health through early detection, prevention and education. Baltimore residents can visit CHEC for free health screenings, health information and wellness programs — with no appointment needed.

The following health screenings are available at CHEC:

- blood pressure
- cholesterol
- body-mass index
- HIV
- blood sugar
- pregnancy tests

In addition, UMMC Midtown Campus provides robust health education and outreach services, including:

- Wellness programs (from smoking cessation to infant care)
- CDC/NIH National Diabetes Prevention Program
- Maryland Healthy Men Program
- Violence Intervention Program
- Workforce development programs

## BREAKING GROUND TO ENHANCE ACCESS TO CARE

UMMC Midtown Campus broke ground Nov. 2, 2017, for a 13-story patient care tower to be completed in 2020. The \$116-million building will be home to a new regional center of excellence for population-health improvement and chronic-disease management. The 275,000 square feet will include a café on the ground floor and 250 parking spaces. Design and construction will incorporate “green” LEED principles, including a vegetated roof and other energy-saving features.
