

The new regional medical center on the Eastern Shore

A Comprehensive Solution to Transforming Health Care on the Eastern Shore

University of Maryland Shore Regional Health's new Regional Medical Center in Talbot County will promote greater access to hospital services for residents of Caroline, Dorchester, Kent, Queen Anne's and Talbot counties. The state of the art healthcare facility is designed to improve the health status of the Eastern Shore. In partnership with University of Maryland Medical System, it will serve as a vital asset to recruit and retain physicians, advanced practice professionals, and the clinical and support staff needed to provide high quality, clinically advanced medical care to the region.
