

Sepsis Program

UMMS **new** Clinically-led Definition of Sepsis

Sepsis: Infection + organ dysfunction*

*Organ dysfunction may include:

- SOFA $\Delta \geq 2$
- GCS $<15/AMS$
- Hypotension
- Acute respiratory failure
- AKI/ATN
- Coagulopathy
- Ileus
- Thrombocytopenia
- DIC
- Total bilirubin >4
- Lactate >2
- NSTEMI

This definition removes ‘~~Severe Sepsis~~’

Septic Shock: Sepsis + hypotension
requiring vasopressor support
