

What's That?

With the launch of Portfolio coming up in the near future, you may overhear a lot of “Epic speak” and unfamiliar terminology. We hope to clear up some confusion with this glossary of common terms!

- **ASAP** -- Manages Emergency Room (ER) visits, displays which rooms are occupied and bed status.
- **Beacon** -- The chemotherapy module, built around treatment plans for patients receiving cancer treatment.
- **Beaker** -- The laboratory software system for a hospital lab.
- **Cadence** -- Used to schedule and track patient appointments for Outpatient and specialty clinics.
- **Canto** -- Mobile Phone Access
- **Clin Doc** -- Inpatient Nurse/Ancillary Staff Workflows. Documentation (notes, records of medication administrations, etc.) entered in a patient's hospital chart.
- **Cogito/Clarity** -- Executive Reports, Data Warehouse and Data Repositories. Stores clinical data in the reporting area in databases that can be queried to support care decisions, manage costs and identify trends.
- **Epic Everything** -- Meaningful Use
- **EpicCare Ambulatory** -- Ambulatory Clinical Documentation. For documenting visits, placing orders, performing procedures, reviewing results and sending communications to patients.
- **EpicCare Everywhere** -- Interoperability with other organizations, both Epic and non-Epic
- **EpicCare Inpatient** -- This is the umbrella over Clin Doc and Orders
- **EpicCare Link** -- Epic's web-based application for connecting organizations to their community affiliates
- **Haiku** -- Tablet Access
- **Healthy Planet** -- Population Health
- **HIM** -- Stands for Health Information Management, which provides tools to simplify medical records management tasks, including chart and film tracking, chart deficiencies, release of information and coding and abstracting.
- **Kaleidoscope** -- This Epic module allows ophthalmologists and optometrists to perform eye exams, document eye-related procedures and write contact lens and eyeglass prescriptions.
- **MyChart** -- Patient Portal. Allows patients to view portions of their medical records and interact with their physicians over the Internet.
- **Optime** -- Epic's operating room management application.

- **Orders** -- Inpatient Physician Workflow. A grouping of orders with multiple procedures and/or medications that are often ordered together.
- **Ortho** -- Outpatient Ortho
- **Prelude/ADT/Grand Central** -- ADT stands for Admission, Discharge, Transfer. Improves bed utilization and gives users the tools to manage hospital stays from pre-admission through discharge.
- **Radiant** -- The Radiology module for Epic, which provides for documentation, film tracking and viewing of radiology images.
- **Resolute Hospital Billing (HB) and Resolute Professional Billing (PB)** -- Hospital Billing (HB) and Professional Billing (PB): Epic's revenue cycle application managing overall billing.
- **Rover** -- Barcode Medication Scanning and MobiLab
- **Stork** -- The Obstetrics module for managing pregnancy episodes on the Outpatient side and documenting deliveries in the hospital.
- **Willow** -- Epic's inpatient pharmacy application that supports the workflows and routines for health care professionals in inpatient pharmacy settings
- **Workbench and Radar** -- System Reports
