

## Simulate an Automated Evaluation Delivery

Simulation can be executed on any of the individual evaluation rules or all of the combined rules together. To simulate automated evaluation delivery, click on the Simulate Delivery link

MedHub will display the following screen:

A screenshot of the MedHub 'Simulate Delivery' screen. The breadcrumb trail at the top reads 'Home » Evaluations » Automated Evaluations » Simulate Delivery'. The main heading is 'Simulate Delivery'. Below this, the 'Automated Evaluation' is set to 'Generic Automated Evaluation Rule' with a '[ SELECT MULTIPLE ]' link. The 'Start Date' is '08/22/2016' and the 'End Date' is '09/21/2016', both with calendar icons. The 'Date Range\*' is 'MM/DD/YYYY MM/DD/YYYY (90 days maximum)'. Under 'Evaluation Types\*', four options are checked with green checkmarks: 'Resident evaluation of other resident (peer)', 'Resident evaluation of faculty member', 'Resident evaluation of a service/clinic', and 'Faculty evaluation of a resident'. A note below states '(at least one type is required)'. A green 'Submit' button is at the bottom.

For the automated evaluation rule shown, select:

**Date Range** — date range must not exceed 30 days for any simulation

**Evaluation Types** — All rules for this automated evaluation will be checked by default

Results will be shown:

Multiple days of no activity, then on the trigger date (in this example 3 days prior to the end of the rotation) many evaluations set to be delivered. The simulation allows Administrators to be confident about what MedHub is going to do before MedHub has actually done anything. If the Administrator discovers incorrect matches, these can be addressed by correcting the schedule assignments and re-running the simulation.

## Simulate Delivery

Automated Evaluation(s): **Generic Automated Evaluation Rule**  
 Date Range: 8/22/2016 - 9/21/2016  
 Evaluation Types: Resident evaluation of other resident (peer)  
 Resident evaluation of faculty member  
 Resident evaluation of a service/clinic  
 Faculty evaluation of a resident
