*This combined micro rotation allows the residents to attend the daily plate round conference with the microbiology division at Site 1.

**Electives can be in any subspecialty and in any location (National and International).

†Research can be taking as an elective in one or two blocks, however, normally research is done throughout each year and each rotation as time allows.

††AP1, 2, 3, 4 have responsibilities in the AP Subspecialties (AP1: GI, Medical/Transplant Liver and Renal; AP2: Breast Thoracic and Head & Neck; AP3: GU and GYN; AP4: “a la carte” the residents can choose from any of the subspecialties in AP1, 2, and 3 to have additional training in that area. *These rotations include tumor board responsibilities in the subspecialty areas within the rotation.*

‡Residents cover Site 1 and Site 2 autopsy service as well as neuropath service at Site 1.

v Variable – there is a mix between outpatient and inpatient specimens during these rotations.

‡: These rotations are “lab director” rotations consisting of chemistry and micro as well as a focus on other various areas of the CP laboratories in addition to lab director level responsibility in the chemistry and/or microbiology laboratories: Lab Director 0 is composed of lab directorship in micro and chemistry (pre-requisite of one micro rotation and 1 chemistry rotation; Lab Director 1 has an additional focus on cytogenetics; Lab Director 2 has an additional focus on molecular pathology and Lab Director 3 has an additional focus on HLA in addition to the duties outlined in LD0 rotation)

Note: Vacation time is allowed during any block/rotation with the exception of surgical pathology. At the beginning of each academic year each resident provides the program with the months that they will be using vacation time. The schedule is made to accommodate the requests. Vacation duration can be one day up to two-weeks. If over a week, vacation must be split between 2 blocks. On surgical pathology, the resident must arrange coverage if vacation is needed unless in the case of emergency.
