

Facts

University of Maryland Greenebaum Comprehensive Cancer Center

The University of Maryland Marlene and Stewart Greenebaum Comprehensive Cancer Center (UMGCCC) is one of the top cancer treatment and research centers in the country. As a National Cancer Institute (NCI)-designated comprehensive cancer center and part of an academic medical community, UMGCCC integrates cutting-edge treatments with scientific research and a commitment to medical education for Marylanders and beyond.

HEALTH SERVICES AND CLINICAL EXCELLENCE

A team approach to care, in which specialists from all cancer disciplines work together to develop an individualized treatment plan for each patient.

Minimally invasive treatment options, including stereotactic body radiation therapy, robot-assisted surgery and the newest, targeted drug therapies.

Innovative clinical trials offering patients promising new therapies, often years before they are available commercially.

Patient-focused treatment environment featuring the new home of UMGCCC (to come in late 2026), the Roslyn and Leonard Stoler Center for Advanced Medicine. The facility will roughly double UMGCCC's current footprint and offer state-of-the-art private rooms and treatment areas, with innovative options for patients, families and visitors. An active translational **research program**, making advances in developing cancer vaccines, new technologies, novel cancer-fighting agents and promising combination therapies.

Top-rated nursing staff specially trained in cancer care and consistently rated as outstanding in-patient satisfaction surveys. Accredited with a four-year Magnet® designation from the American Nurses Credentialing Center (ANCC), nursing staff of the University of Maryland Medical Center are also among the best in the nation.

Support services, including social work, patient navigators, genetic and nutrition counseling, palliative care and a specialized image renewal center offering wigs, skin care and other services.

Education, outreach and free cancer screenings for underserved individuals through the **Baltimore City Cancer Program**. Find out more at umm.edu/hope or by calling 410-328-HOPE.

With six cancer centers across Maryland, the University of Maryland Medical System allows residents to benefit from **specialized cancer expertise and clinical trials close to home**.

Facts

University of Maryland Greenebaum Comprehensive Cancer Center

OUR NATIONAL PROFILE

In 2016, UMGCCC became a National Cancer Institute (NCI)- Designated **Comprehensive Cancer Center**, a distinction shared by less than 60 centers across the US.

Cancer research funding at UMGCCC has grown dramatically since 2002 — from \$19.4 million to \$137 million — and continues to drive scientific discovery by our cancer experts, all of whom are faculty of the UM School of Medicine. UMGCCC is a leader in addressing cancer disparities, with research focused on improving access to care and treatment outcomes for minorities, who represent 56 percent of the patients in our clinical trials, compared to 16 percent nationally.

The **Maryland Proton Treatment Center** is a state-of-the-art facility that provides proton therapy, a precise form of radiation that targets tumors directly while sparing healthy, surrounding tissue.

Ranked among the **top 50 Best Hospitals for Cancer** by *U.S. News & World Report*, UMGCCC is leading the nation in developing and delivering groundbreaking treatments for cancer. We are the **first in the U.S. to break through the blood-brain barrier**

to deliver disease fighting drugs to the brain. We are the **first to develop aromatase inhibitors** and **GammaPod**, new options to treat breast cancer. And we are the **first in the region to offer CAR-T cells**, a customized immunotherapy treatment.

SPECIALTIES

- Brain Cancer
- Breast Evaluation and Treatment
- Cardio-Oncology
- Endocrine Malignancies
- Gastrointestinal Cancer
- Genitourinary Cancer
- Gynecologic Cancer
- Head and Neck Cancer
- Hematologic Malignancies
- Neuro-Oncology
- Ocular Oncology
- Pediatric Oncology
- Skin Cancer
- Transplant and Cell Therapy (Bone Marrow and CAR-T)
- Thoracic/Lung Cancer
