

FACTS

University of Maryland Upper Chesapeake Health (UM UCH) is dedicated to maintaining and improving the health of its community. As a member of the University of Maryland Medical System, the state's largest health system, we not only deliver advanced care locally, we also provide access to expanded clinical services and academic medicine.

CLINICAL EXCELLENCE

- UM UCH includes two acute care, not-for-profit medical centers — UM Upper Chesapeake Medical Center in Bel Air and UM Upper Chesapeake Medical Center in Aberdeen.
- UM UCH provides access to the county's largest network of primary and preventive care providers, serving over 36,000 patients across seven practices, as well as convenient urgent care locations in Aberdeen, Fallston and Forest Hill.
- The Kaufman Cancer Center offers individuals facing cancer the best possible care right here in our community. Our affiliation with the UM Marlene and Stewart Greenebaum Comprehensive Cancer Center means access to leading technologies and clinical trials with highly trained experts on site providing the most advanced — and uniquely personalized — cancer care for every patient.
- The Klein Family Center, voted "best in addictions counseling" by *Harford Magazine's* Best of Harford list, helps people overcome the challenges of all types of mental health conditions, including substance use, regardless of insurance and ability to pay. It has been Harford County's behavioral health hub since 2019, and provides urgent care, outpatient therapy and residential stabilization care, serving both adults and children.
- The innovative Comprehensive CARE Center is an outpatient transitional health program that serves as a bridge between the hospital and community. It is dedicated to helping patients navigate the right care in the right setting.
- With a strong commitment to virtual outpatient visits and remote monitoring, UM UCH has over 16,000 virtual health visits per year across its primary care and ambulatory providers.
- UM Upper Chesapeake Medical Centers in Bel Air and Aberdeen are designated as Maryland Institute for Emergency Services Systems (MIEMSS) Primary Stroke Centers, which means they are extremely well-equipped to treat people with symptoms of stroke and provide specialized acute care.
- University of Maryland School of Medicine faculty physicians across more than 20 specialties bring their expertise to UM UCH to provide care locally. These specialty services range from breast to spine surgery and gynecologic oncology to pediatric endocrinology.

REINVESTING IN THE COMMUNITY

Excess of revenues over expenses are dedicated to:

- Supporting Cancer LifeNet, a support and navigation program that helps people cope with the physical, financial, psychological and emotional aspects of having cancer.
- Helping to provide care for more than 900 pediatric guests through Klein Family Center’s walk-in urgent care and more than 850 young individuals through its outpatient clinic.
- Providing compassionate, end-of-life care to residents and families of the Senator Bob Hooper House, ensuring that no one is turned away for their inability to pay.

IN THE COMMUNITY

- The Community Outreach and Health Improvement team is dedicated to promoting health and wellness outside of the hospital and to increasing the quality of life in our local communities. Focusing on prevention and improving health outcomes, the team provides health education, screenings, lifestyle management classes and information on referrals and local resources. Its Medical Mobile Unit also accesses areas and populations that are otherwise unreachable.
- UM Upper Chesapeake Health is a founding leader of Healthy Harford, the non-profit healthy communities coalition of Harford County dedicated to the health and wellness of the community. Healthy Harford has worked with local government agencies, businesses, non-profits, and citizens dedicated to improving the health of Harford County residents through education, policy changes, access to care, and a focus on social determinants of health and health equity.

At UM Upper Chesapeake Health, we’re colleagues *and* neighbors, with nearly eighty percent of our team members living in Harford and Cecil counties.
