

## Welcome to Women's Health Associates!

WE ARE DELIGHTED that you have chosen us for your obstetric and gynecologic care. Our entire staff—including our four physicians and nine midwives—is committed to providing you with the best possible medical care in a compassionate, thorough and caring manner.

Please take a few minutes to read this information. On your first visit, if you haven't already completed your new patient information forms, you'll be asked to do so, and to present your valid insurance card and photo ID. We participate with most insurance plans—but please remember that it is each patient's responsibility to ensure that the physician or midwife you're visiting at Women's Health Associates is a participating provider before making the appointment.

Our office hours are from 8 am to 4 pm, Monday through Friday. If you need to cancel your appointment, we ask that you notify us at least 24 hours in advance, so that we may offer that time to another patient. If a patient fails to show for an appointment and does not provide 24-hour notice, future appointments may not be granted. Your cooperation is very much appreciated; this policy is meant to be respectful of our patients' and providers' time.

When you visit us, please plan to arrive 15 minutes prior to your scheduled time, so that we can comfortably complete your registration—and welcome you!—before your appointment.

Again, welcome and thank you for your trust in Women's Health Associates. We look forward to offering you the highest quality of professional care...And we can't wait to meet you!

Sincerely,  
Women's Health Associates Providers & Staff

# Obstetrics, Gynecology and Midwifery Care at Women's Health Associates

THE PROVIDERS AND STAFF at Women's Health Associates look forward to working together with you to support your gynecologic needs, and, if you're pregnant (or planning to be!), a wonderful pregnancy and birth experience. Below is information that will help you get to know us better and reach us whenever needed:

- We are located at **7300 York Road in Towson, Maryland** (21204).
- Our office telephone number is **410 427-5470**. This is the only number you will ever need, day or night, to reach our care team.

## Physicians

Andrea Collierius, MD  
Jabin Janoo, MD

## Midwives

Lauren Arrington, CNM  
Eliza Gould, CNM  
Kristen Janiszewski, CNM  
D. Monique Klapka, CNM  
Jessica Linzmeier, CNM  
Maria Mayzel, CNM

Gigi Moore, CNM  
Julia Perkins, CNM  
Heather Schwantes, CNM  
Mette-Jaya Ramanathan, CNM

## Nurse Practitioner

Anna Swift, NP

All of our **physicians** are board certified with the American Board of Obstetrics and Gynecology. These highly skilled and experienced women's reproductive health providers are on staff at University of Maryland St. Joseph Medical Center. Our **midwives** are registered nurses who are certified by the American Midwifery Certification Board and have extensive training in obstetrics and gynecology. In addition, all of them have master's degrees with health-related concentrations.

**As a Women's Health Associates patient, you can be confident that our caring and skilled team will work together to offer you exceptional care.**

**OBSTETRICS PATIENTS:** When you are pregnant, you may see either the physicians, midwives or both, depending on the level of care needed. You will be encouraged to see all the providers in our practice so that you can become familiar—and comfortable—with each. This will allow you the opportunity to meet everyone, so that, and when in labor, you will have already established a bond with the entire care team. Our physicians and midwives cover Labor and Delivery 24 hours a day, seven days per week, so someone from Women's Health Associates—a provider you've already come to know—will be present during your delivery.

**GYNECOLOGY PATIENTS:** Our physicians and midwives provide general gynecologic care to women of all ages: adolescent, adult and mature/geriatric. In addition, they provide annual exams, problem visits, pre-pregnancy counseling and assistance with family planning, disease prevention and general health care. Your care at every stage of life is very important to us, and we look forward to a healthy and lifelong relationship.
