

## **Hematology/Oncology Fellowship Training Program**

## **GU Clinic**

## **EDUCATIONAL GOALS:**

- 1. Describe the incidence, epidemiology, risk factors and initial evaluation of the major genitourinary malignancies (bladder, prostate, renal and testicular)
- 2. Describe basic approaches to staging for the major GU malignancies
- 3. Describe stage-directed therapeutic approaches for the major GU malignancies
- 4. Demonstrate familiarity with the role and approaches of radiation oncology and urologic surgery in the multi-disciplinary management of the major GU malignancies
- 5. Demonstrate familiarity with the mechanism, toxicities and costs of chemotherapy as applied to the major GU malignancies
- 6. Demonstrate familiarity with the mechanism, toxicities and costs of endocrine therapy as applied to prostate cancer
- 7. Demonstrate familiarity with the mechanism, toxicities and costs of bone-directed therapy as applied to the major GU malignancies, with a particular focus on these therapies in prostate cancer
- 8. Interpret baseline and re-staging scans of patients with the major GU malignancies, and understand how to utilize them as part of a comprehensive data-set to construct a comprehensive treatment plan
- 9. Participate fully in the weekly multi-disciplinary GU Tumor Board, including presentation of the cases and participation in discussions on treatment planning and follow-up
